2026 Bull Sale

Friday 17th July 1pm

Tenterfield NSW

Welcome to the 2026 Inglebrae Farms Angus Bull Sale flyer drop.

It has been pretty tough here in the New England for the past couple of months with the drought conditions, not just us though, but out west and as far south as Parkes, the dry has taken its toll and we have had to start drought feeding. However, it has been good to hear that those just East of us in the Northern Rivers and to the North into QLD, are enjoying a normal season (for a change), we are in hope though, with the May forecast of rain that it will bring some relief to us and the surrounding areas and with it a hopeful Spring.

Being under the drought conditions it has changed, this year, the way the bulls are prepped for sale. Normally grazed off oat crops to this year they are on an oaten based silage ration and a pellet made from protein meals with required minerals. However, the sale bulls were completely grass-fed right through till the five-month mark of pre-sale prep and I believe they will present by sale day at normal weights.

Inside our flyer are the sale group reference sires and a few examples of the sale bulls at 20 months of age. The bulls will be 22 to 23 months on sale day.

We are always grateful to the producers both locally and far a-field that make their way to our sale day, Friday 17th July to source their genetics at Inglebrae.

Inspections are always welcomed,

Regards Manager Darren Battistuzzi.

2025 Top Price Bull. Lot 1 sold to
Adrian & Megan Forrest, Augathella

Reference Sires

AI SIRE

Knowla So Right S48 was the \$190,000 high selling bull at Knowla Livestock's 2022 sale. Purchased by Spyr's Angus and Cottage Creek Angus. He is long-bodied, free-moving with a tremendous carcass outlook and docile with the backing of a high performing maternal line. He is new genetics to the Inglebrae herd, his calves have been thick and long from the start and his daughters are feminine, showing the typical softness we like through our females. We used him lightly through AI the first year and will present 6 sons that will be a feature in 2026. And look out for 2027 with 20 sons!!!!

AI SIRE

Stern Razor 521 was the top priced New Zealand Angus bull for 2023 at \$98,000. And at this stage you won't get them anywhere else in Australia.

Moderate, long body, thick-made a very free athletic mover and structurally correct throughout, with high calving ease and a very low birth, moderate through the growths that is typical of the New Zealand cattle, and high positive fats. I purposely fold these New Zealand bulls back through our herd when they come along keeping their fats up and feet straight. There will be a handful of sons in 2026 and 2027, that will be great options for heifer matings with extra carcass.

AI SIRE

Inglebrae Farms Spinkler S31 was our top priced selling bull in 2023, in which I retained semen for our own in-herd use. I used him heavily, as S31 fitted the mold I would love to fit every bull into. Perfect structure and his image says it all from head to tail just how I like them. Thick-made with a soft but heavy muscle patten, square out through the hip-set and deep down through the flank. And the backing of his dam, P102, with every daughter retained and the only other son selling last year for \$14,000. There will be at least 13 sons of S31 in 2026 and a handful in 2027.

AI SIRE

Inglebrae Farms Remedy R16 sold in our 2022 sale to a loyal, long standing commercial client for the second top price of the sale. Once again, I wanted to fold his dam's performance back through our herd and yet another perfect Matauri Reality daughter. R16's docility is perfect, always fat, with a great visual carcass outlook and length of body. His 5 sons will present data that is well balanced for calving ease, low to moderate birth, good growth, scrotal, carcass, positive fats and extra marbling. Great heifer joining options.

WALKING SIRE

Millah Murrah Rector R74 Purchased in 2021, and now as a six-year-old, his mature presence is phenomenal, long with a very heavy visual carcass and a perfect temperament. R74 has progeny now in seven herds, his sons continue to sell well and present with calving ease, lower birth with good growth carcass and marbling, 5 to present this year. We are putting his genetics right throughout our own commercial herd.

WALKING SIRE

Inglebrae Farms Rambo R7 Retained sire with extra thickness, visual bone and volume with great temperament and balanced dataset right across the sheet with marbling jumping out to 4.7. Rambo sired the top price bull last year in 2025 at \$27,000 and all other sons selling above the sale average. 6 sons this year.

Lot 40 - Inglebrae Farms Spinkler S31 son

Lot 36 - Inglebrae Farms Rambo son

Lot 24 - Stern Razor 521 son

Lot 20 - Stern Razor 521 son

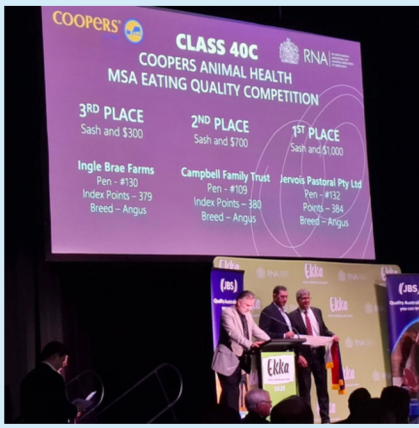

Lot 7 - Inglebrae Farms Spinkler S31 son

Lot 2 - Knowla So Right son

Images of the **RNA 2025 Paddock to Palate Competition**. We don't normally chase carcass competitions, but after being encouraged to give it ago by our JBS buyer, Mick Thomas, we were very grateful to come away with a 3rd place ribbon in the MSA Eating Quality section.

Always keep in mind the end product when making your bull selection.

Our Open Day Bull Walk

Wednesday 8th July 10am -3pm

where you can inspect the bulls in large viewing pens without the rush of sale day.

Complimentary BBQ and Refreshments available

This year we will be holding the sale on 2 online platforms Stocklive AND Auctionsplus. So whatever your preference for buying we encourage you to register a few days before the sale to familiarize yourself with each platform's process.
